

FiberCell Biobased Medium

FIBERCELL BIOBASED MEDIUM PAPER

Our Biobased family combines different biobased fibers to create an environmentally friendly product with the degradation time desired by the customer. This is a paper with a broad range that is used for propagation of a wide variety of crops.

Key benefits with our Biobased Medium paper:

- Manufactured from natural starch based fibers
- The paper is biodegradable
- Propagation time approx. 14 months (depending on soil conditions)
- No glue on the paper, self-sealing fibers in material.
- Perforations allow roots to penetrate through paper for effective air pruning
- Thin paper (more meters on a roll), which makes it more cost efficient when it comes to freight and logistics

Specifications FiberCell BIOBASED Medium

Segment	Herbs, Leafy Greens, Forestry, Flowers, Fruit, Nuts, Berries, Indigenous trees, Ornamentals, Grapevines & Citrus
Propagation time	Approx. 14 months (Depending on soil conditions)
Biodegradable	Yes
Certifications	OK Biobased
