

FIBERCELL

FiberCell Prime Fast

FIBERCELL PRIME FAST PAPER

The Prime Fast Paper are suitable for crops with a shorter propagation time. Our Prime Fast paper are well-suited for a wide segment of crops, including lettuce and various kinds of herbs. The propagation time is approx. 1-4 months. Their durability and optimized decomposition time make them an excellent choice for growers looking to cultivate leafy greens and aromatic herbs efficiently, ensuring strong root development and healthy plant growth.
