

FiberCell Biobased Fast

FIBERCELL BIOBASED FAST PAPER - HERBS & LEAFY GREENS

Our Biobased family combines different biobased fibers to create an environmentally friendly product with the degradation time desired by the customer. This is a versatile paper with a broad range of applications. It is used for propagation of a wide variety of crops, including herbs and leafy greens, which benefit from the paper's optimal balance of moisture retention and breathability. Whether you're cultivating basil, lettuce, or spinach, this paper provides a paper plug with a reliable, sustainable foundation for healthy growth from seed to transplant.

Key benefits with our Biobased Fast paper:

- Biobased material (starch-based)
- Does not contain any fossil-derived or synthetic plastic
- The paper contains cellulose
- Biodegradable
- Propagation time approx. 1 - 2 months (depending on soil conditions)
- Easy for roots to penetrate through paper for effective air pruning

Specifications FiberCell BIOBASED Fast	
Segment	Herbs, Leafy Greens, Lettuce & Micro Greens
Propagation time	Approx. 1 - 2 months (depending on soil conditions)
Biodegradable	Yes
Certification	FSC-C139107
