

FIBERCELL

FiberCell Prime Medium

FIBERCELL PRIME MEDIUM PAPER - BERRIES

The Prime Papers are suitable for crops with both shorter and longer propagation time. Our Prime Medium Paper can be used for propagation of crops with a longer propagation time. This paper can be used for growing berries, where the structure of the paper pot supports uniform root development and optimized water retention—ideal for delicate and high-value crops.

Key benefits with our Prime Medium paper:

- The paper allows for good lateral root development and effective air pruning
- Made from cellulose sourced from responsibly managed forests
- Propagation time from 4 – 12 months
- Easy to handle and suitable for sorting and spacing

Specifications FiberCell PRIME "Medium"

Segment	Strawberries, Blueberries, Raspberries, Blackberries etc.
Propagation time	4-12 months (Depending on soil and climate conditions)
Degradable	Yes
Certifications	FSC-C139107
