

FIBERCELL PRIME MEDIUM PAPER - GRAPEVINES

The Prime Papers are suitable for crops with both shorter and longer propagation times. Our Prime Medium Paper can be used for propagation of crops with a longer propagation time. This paper is well-suited for the propagation of grapevines, where the paper pot provides a structure that promotes consistent root development and optimal moisture retention—essential for successful establishment of this high-quality crop.

- Key benefits with our Prime Medium paper:**
- The paper allows for good lateral root development and effective air pruning
 - Made from cellulose sourced from responsibly managed forests
 - Propagation time from 4 – 12 months
 - Easy to handle and suitable for sorting and spacing

Specifications FiberCell PRIME "Medium"	
Segment	Grapevines
Propagation time	4 - 12 months (Depending on soil and climate conditions)
Degradable	Yes
Certifications	FSC-C139107
